Low

### REACH COMPLIANT

Date of issue

### Gluteraldehyde based tanning and retanning agent.

BOTSYN GT is suitable for tanning metal free leathers.

It can be used in rechroming chrome leathers, providing fullness, roundness and body to resultant crust.

Its use improves penetration and distribution of vegetable and synthetic retanning agents.

### Application

The recommended quantities of BOTSYN GT are 2-6 % depending on article being processed

### Shelf life

The product can be stored in its original packaging between 5°C and 35°C for 8 months.

The information and recommendations given are provided on the basis of our best current knowledge, supported by applied experience and accurate testing. However, this information does not constitute a guarantee or responsibility for product use, which must always be checked and evaluated by each individual client.
