Brownish liquid

Base:

DCD

Solids:

75 (+/- 2) %

pH (@ 10% aqueous soln.):

8.0 - 9.0

Charge:

Anionic

Light Fastness:

Moderate

REACH COMPLIANT

Date of issue

Concentrated DCD, low salt product in liquid form.

BOTSYN DCW is suitable for retanning leathers where we need to work on improving grain compactness along with belly filling and suppleness in leather.

BOTSYN DCW is compatible with vegetable extracts as well all regularly used syntans in crusting process.

It gives good white colour.

It has fair lightfastness and is free from free formaldehyde.

If used after fat liquoring, improves substantially break and belly filling.

It helps in reducing pollution load substantially, being free from salts.

Application

The recommended quantities of BOTSYN DCW are 2-6 % depending on article being processed.

Shelf life

The product can be stored in its original packaging between 5°C and 35°C for 8 months.
