BOTSYN M

CHARACTERISTICS

Appearance:

Brownish Liquid

Base:

Melamine

Solids:

75 (+/- 2) %

pH (@ 10% aqueous soln.):

5.0 - 7.0

Charge:

Anionic

Light Fastness:

Good

REACH COMPLIANT

Date of issue

Concentrated Melamine, low salt product in liquid form.

BOTSYN M is suitable for retanning leathers where we need to work on improving grain compactness along with belly filling and suppleness in leather.

It helps in controlling looseness in leather.

BOTSYN M is compatible with vegetable extracts as well all regularly used syntans in crusting process.

It has good lightfastness and is free from free formaldehyde.

It helps in reducing pollution load substantially, being free from salts.

Application

The recommended quantities of BOTSYN M are 2-6 % depending on article being processed.

Shelf life

The product can be stored in its original packaging between 5°C and 35°C for 8 months.

The information and recommendations given are provided on the basis of our best current knowledge, supported by applied experience and accurate testing.
