BOTSYN PH

CHARACTERISTICS

Appearance:

White Powder

Base:

Phenolic

Solids:

94 (+/- 2) %

pH (@ 10% aqueous soln.):

3.0 - 4.0

Charge:

Anionic

Light Fastness:

Good

REACH COMPLIANT

Date of issue

Phenol condensation product, for tanning and retanning leathers.

BOTSYN PH has got very good self-tanning power hence, it can be highly recommended in the production of chrome free or wet white tanning.

BOTSYN PH enhances excellent light fastness of the leather with more uniform dyeing of pastel color.

In combination or vegetable extracts improves penetration or tanning with a clear color and elastic grain and it dissolves easily and thus no sludge formation is found.

Its use gives fuller leather with fine and smooth grain and the color will be very clear and it improves buffing properties of crust.

Application

It can be used upto 24 % on pelt weight for solo tannage.

It can be used 8 - 12 % on pelt weight in combination with vegetable extracts to tan light colour vegetable crust.

It can be used 2 - 8 % during retanning depending on article being processed.
