BOTSYN LA

CHARACTERISTICS

Appearance:

Clear/Pale Yellow Transparent Liquid

Base:

Aliphatic Aldehyde

Solids:

45 (+/- 1) %

pH (@ 10% aqueous soln.):

7.0 - 8.0

Charge:

Anionic

Light Fastness:

Good

REACH COMPLIANT

Date of issue

Aliphatic Linear Aldehyde based retanning agent

BOTSYN LA is amphoteric in nature, so can be used at either stage of tanning & retanning.

BOTSYN LA is free from free formaldehyde, so non-yellowing in nature and has excellent light fastness.

When used in fat liquoring, it helps in better exhaustion of fatliquor.

It helps in maintaining the mellowness of leather with very good surface touch as well fine and flat grain.

Application

During tanning process use 1 - 3 % BOTSYN LA, before chrome addition.

During retanning can use 2 - 4 % anywhere in process as per need.

03-11-2023

Shelf life

The product can be stored in its original packaging between 5°C and 35°C for 8 months.
