Base:

Synthetic sulphited Esters.

Solids:

52 (+/- 2) %

pH (@ 10% aqueous soln.):

7.0 - 8.0

Charge:

Anionic

Light Fastness:

Good

REACH COMPLIANT

Date of issue

Inverse emulsion of water in oil for soft and damp touch.

BOTFAT JEO helps in homogenisation and redistribution of natural fats of leather.

BOTFAT JEO makes leather soft and damp to touch and is completely lightfast.

It shows excellent stability to mineral tannins and is recommended for use in tanning and retanning.

Preferably should be used alone due to its particular properties.

Application

Stir well before use.

To required quantity of BOTFAT JEO add slowly 3 times its weight of water at 60° C, while constantly stirring

Recommended quantity to use can vary from 1 - 6 % depending on article being produced.

shelf life

The product can be stored in its original packaging between 5°C and 35°C for 8 months.
